German ocean carrier Hapag-Lloyd has announced changes in the Europe East Coast Express (ECX) service.

From mid-April until further notice, Hapag-Lloyd said the vessels deployed on the ECX service will be omitting the port of Navegantes in Brazil.

Therefore, a weekly feeder service will be introduced between Navegantes and Rio de Janeiro in Brazil for both import and export cargo.

Port rotation: Navegantes, BR -> Rio de Janeiro, BR -> Navegantes, BR
